

Quentin Mayer

Full-Stack Developer — Back-end, Front-end & Databases

Final-year Epitech student (graduating 2027) with four professional experiences in web, mobile and database development since 2023. I build and run products end to end: design, front end, back end, deployment and production database.

Skills

LANGUAGES

TypeScript · JavaScript · Python · C · C++ · C# · Kotlin · PHP · SQL · Haskell

FRONT-END & MOBILE

React · Next.js · React Native · WordPress · Figma (UX/UI)

BACK-END

Express.js · .NET (C#) · Flask · REST APIs · Stripe

DATABASES

PostgreSQL · SQL Server · Supabase

DEVOPS & TOOLS

Git · GitHub · Vercel · Jira · Scrum

Languages

French	*Native*
English	*B2/C1*
German	*A2*
Korean	*Beginner*
Czech	*Beginner, learning*

Interests

Running (half-marathon in 1:27), climbing (6C), basketball and football. Travelling and cooking dishes from around the world.

Experience

Family Innovation · La Salle du Temps (coaching studio)

Full-Stack Developer Intern · DevOps & Database — Sep 2026 – Feb 2027

- Maintain and extend the whole LSDT ecosystem (lasalledutemps.com): management dashboard, mobile booking app, REST API and showcase website.
- Own deployments and environment setup for every part of the stack.
- Administer the production database and resolve user issues directly in it (account unlocks, data fixes).

Freelance Back-end & Mobile Developer — Mar 2026 – Jun 2026

- Built a mobile app for booking coaching sessions, front end and back end.

Front-end Developer Intern — Apr 2025 – Jul 2025

- Rebuilt the studio's back-office dashboard from scratch: UX/UI design, database rework and the complete front-end build.
- Worked autonomously: made the key architecture and tech-stack decisions, and delivered full documentation for the back-end handover.
- Challenged features and business rules with the company and recommended optimisations.

Epitech · International Student Ambassador — Seoul, South Korea · 2025 – 2026

- Point of contact for 30 Epitech students during their year abroad in South Korea.
- Represented the school abroad: communication and photo content for its channels.

PwC Luxembourg · Data Architecture team — Luxembourg · Jul 2023 – Dec 2023

Full-Stack Developer Intern

- Built front-end and back-end features for an internal metadata management tool.
- Worked with the team's deployment pipelines and database layer.
- Delivered in an agile Scrum team (daily stand-ups, sprints, code reviews).

Projects

iziClub · Co-founder & Project Lead · Epitech Innovative Project — 2026 – 2027

- Co-founded iziclub.fr and lead a team of 4 building it: a web admin dashboard for local sports clubs and a public mobile app to discover clubs and events.
- Own product positioning, communication and marketing: social media, community growth, beta-tester recruitment and usability testing with real users.
- Coordinate the team and organise the agile workflow: create and plan the sprints, write user stories, prioritise the backlog and track delivery.

Senator's website · Front-end Developer — 2025

- Contributed to the official website of a French senator (Meurthe-et-Moselle) in PHP and WordPress, building the UI from scratch with developers and a designer.

Education

Epitech · European Institute of Information Technology, Nancy — 2022 – 2027

Programme Grande École (Master's level) in Computer Science: project-based learning, strong foundations in low-level programming (C/C++).

Chung-Ang University · Seoul, South Korea — 2025 – 2026

Exchange year focused on mobile development and database architecture.
